The MAILING DATE of this communication appears on the cover sheet with the correspondence address Period for Reply						
A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.  - Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.  - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.  - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### DETAILED ACTION

## Response to Amendment

This office action is in response to amendment filed on April 6, 2010. The amendments filed have been entered and made of record. Claims 1, 2, 4-9, 11-16, 18-22 and 24-26 are pending.

#### Response to Arguments

Applicant's arguments filed April 6, 2010 have been fully considered but are moot in view of the new ground(s) of rejection.

### **Double Patenting**

1. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1, 2, 4-9, 11-16, 18-22 and 24-26 of instant application 09/457,209 (hereafter '209) are rejected on the ground of nonstatutory double patenting over claims 1-26 of U. S.

Application/Control Number: 09/457,209

Patent No. 7,035,214 (hereafter '214) since the claims, if allowed, would improperly extend the "right to exclude" already granted in the patent.

Claims 1, 2, 4-9, 11-16, 18-22 and 24-26 of instant application '209 are rejected under the judicially created doctrine of obviousness-double patenting as being unpatentable over claims 1-26 of '214. Although the conflicting claims are not identical, they are not patentably distinct from each other because in view of the obviousness type double patenting rationale enunciated in Georgia-Pacific Corp. v. United States Gypsum Co., 195 F.3d 1322, 1326, 52 USPQ2d 1590, 1593 (Fed. Cir. 1999), both applications claim subject matter that relates to a system and method for transmitting data in a data communications network, using a transmission control protocol, to provide reduced and adjusted acknowledgment control traffic, and the instant application's ('209) above mentioned claims merely claims a system, device, and method for sending keepalive messages in a communication network that involves determining a reliability factor for communicating with a neighbor and setting the frequency for sending keep-alive messages to the neighbor based upon the reliability factor,

which is an obvious variation of a system and method to adjust acknowledgment traffic generated by TCP where a keep-alive request periodically sent from the transmitter to the receiver, and a re-transmission time-out timer set. The congestion window is set to an initial size, a data packet is sent from the transmitter, and the round-trip timer is set. If no negative acknowledgment is received before expiry of the round-trip timer the congestion window is increased. If a negative acknowledgment is received, the length of the congestion window is decreased, as claimed in patent '214.

Art Unit: 2431

Conclusion

Any inquiry concerning this communication or earlier communications from the

examiner should be directed to SYED ZIA whose telephone number is (571)272-3798. The

examiner can normally be reached on 9:00 to 5:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's

supervisor, Ayaz Sheikh can be reached on 571-272-3795. The fax phone number for the

organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent

Application Information Retrieval (PAIR) system. Status information for published applications

may be obtained from either Private PAIR or Public PAIR. Status information for unpublished

applications is available through Private PAIR only. For more information about the PAIR

system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR

system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would

like assistance from a USPTO Customer Service Representative or access to the automated

information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
